

## Degree

`__eq__(degree: typing.Self): bool`

`__ne__(value: typing.Self): bool`

`__repr__(): str`

`__str__(): str`

`add_to_expression(expression: Expression): Expression`

`clone(): typing.Self`

`create_inequality_with_degree_rhs(expression: Expression, inequation_type: InequalityType): Inequation`

`get_degree(value): typing.Self`

`is_number_not_one(): bool`

`is_number_zero(): bool`

`is_numeric(): bool`

`multiply_constant(double: float): Expression`

`subtract_from_expression(expression: Expression): Expression`
